-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Latham (US Patent 6,186,760).

Latham discloses a machine for making molded articles having a plurality of electric components connected through a wireless communication to the machine control, wherein the machine control and the electric components have means to transmit and receive radio waves, i.e. electromagnetic waves.

See Latham column 3, line 55 through column 4 line 48.

Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by either Krause et al. (DE 19909307) or Meschia (EP 1128244) or DE20204359 Utility (Abstract).

Each of the references disclose a machine for making molded articles having a plurality of electric components connected through a wireless communication to the machine control, wherein the machine control and the electric components have means to transmit and receive radio waves, i.e. electromagnetic waves.

See Fig. 1 of Krause et al., Fig. 4 of Meschia and Fig. 1 of DE20204359 Utility.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1722

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over either of Latham (US Patent 6,186,760), Krause et al. (DE 19909307) or Meschia (EP 1128244) or DE20204359 Utility (Abstract) as applied to claims 1,3,4 above, and further in view of Applicant's admitted prior art.

While the above references do not disclose Bluetooth technology as the wireless communication used, Applicant discloses such technology as being conventional and the standard for wireless technology. See paragraph 9 of the specification.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use Bluetooth technology as the wireless communication used since it is conventional and the standard for wireless technology as set forth by Applicant.

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tim Heitbrink whose telephone number is 571-272-1132. The examiner can normally be reached on Tuesday-Friday 5:30-4:00.
